

# DEEP-DEK®

DEEP-DEK® | DEEP-DEK® ACOUSTICAL

**Deep-Dek®** and **Deep-Dek® Acoustical** are deep-fluted roof deck profiles that provide design teams freedom with open space design.

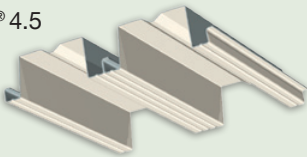

**Deep-Dek®** and **Deep-Dek® Acoustical** provides a dramatic deep fluted visual effect while eliminating unsightly side-lap screw penetrations. The strength of the shape provides impressive span and overhang capabilities making it ideally suited for long, open interior and exterior spaces.

Combine sound absorbing features and **Versa-Steel®** factory applied coatings to give Deep-Dek a desired finish aesthetic while meeting stringent acoustical and structural requirements.

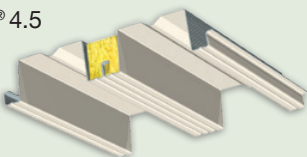

For more information on **Engineered Solutions™** from the **Metal Dek Group®** visit [www.metaldek.com](http://www.metaldek.com)

## Standard Features

- 4.5", 6.0" & 7.5" profile depths
- Clear span capacities up to 34'-0"
- Deep-fluted appearance
- **Dek-Knek®** sidelap conceals fastener tips from the view below

## Options

- Noise Reduction Coefficients (NRC) up to 0.80
- ICC approved
- **Dek-Strut®** hanging system
- **Dek-Lok™** HSL pneumatic installation tool
- **Versa-Steel®** warranted painted metal systems
