

# DEEP-DEK®

CELLULAR | CELLULAR ACOUSTICAL

**Deep-Dek® Cellular and Cellular Acoustical** are long span roof deck profiles that provide design teams unparalleled freedom in open space design.

**Deep-Dek® Cellular and Cellular Acoustical** provide a clean, smooth visual ceiling effect while concealing side-lap and roofing fastener penetrations. The strength of the shape provides impressive span and overhang capabilities making it ideally suited for long, open interior and exterior spaces.

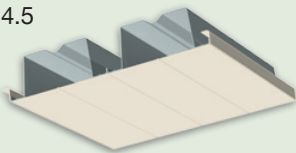

Combine sound absorbing features and **Versa-Steel®** factory applied coatings to give Deep-Dek Cellular a desired finish ceiling aesthetic while meeting stringent acoustical and structural requirements.
