

VERSA-DEK®

VERSA-DEK® S | VERSA-DEK® LS

Versa-Dek® S and **Versa-Dek® LS** are dovetail shaped roof deck profiles that provide a clean, smooth lineal plank ceiling aesthetic while concealing sidelap and roofing fastener penetrations.

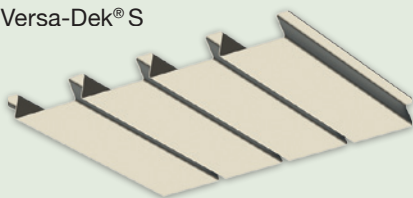

The strength of the shape provides impressive span and overhang capabilities while being ideally suited for open interior and exterior spaces.

Combined with performance engineered **Versa-Steel®** factory applied coatings and sound absorbing features, **Versa-Dek® S** and **LS** are tailored to provide a desired finish ceiling aesthetic while meeting stringent acoustical and structural requirements.
